

CommXPRESS

Powerful Asset tracking tool delivered in a hosted off-the-shelf package...

Designed for operations with significant asset management needs, but limited resources

Designed as a hosted only, 1-2 user application, CommXPRESS provides all the tools needed to effectively manage communications assets without having to worry about server space, bandwidth, or IT support. This combined with remote installation and training means you can focus your resources where they are needed most- on your operation.

While it may be more condensed, CommXPRESS is still packed with the same standard asset management features as CommSHOP 360° and CommASSET 360°. And since we hosted the application, all you need to run it is an internet connection.

System Requirements (*minimum*)

OPERATING SYSTEM:	Windows 2000
HARDWARE:	Pentium 3, 512Mb RAM
SOFTWARE:	Citrix ICA Web Client
NETWORK SPEED:	10 Mb (<i>min</i>) 100Mb (<i>rec.</i>)

CommXPRESS Modules

AGENCY MODULE

Manage the different organizations you work with. View asset assignments, work orders, billing info and more from an agency level.

ASSET MODULE

Track an array of asset specific information such as location, assignment, status, programming info, work orders and more.

REPORTING MODULE

Take advantage of an array of standard reports or have us custom build a report suited to your exact needs.

About Our Hosting Facility

When it comes to hosting, MCM doesn't take any chances. We need a partner that can provide us with the most reliable and secure hosting services available on the market today. Therefore, we partnered with Venture Technologies to ensure that our customers data would be guaranteed secure and accessible no matter the circumstances.

Venture's 10,000-sq.-ft. facility features best-in-class network, security, and power infrastructures. Their Data Center hosts our VTCloud®—an agile, scalable, fully virtualized pool of server, storage, and network assets—that powers Venture's portfolio of VTCloud® Services. Our engineering, operations, and help-desk staffs use robust tools and industry best practices to deliver award-winning service. Services include aggressive SLAs—up to 99.999% uptime.
