

# QuarterMASTER360°

## Asset and Inventory Management

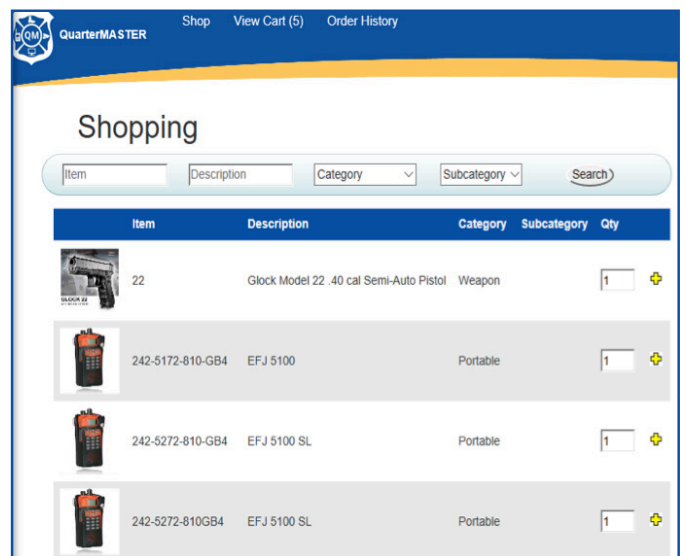

Building on MCM's core competency of asset management and inventory tracking, our new QuarterMASTER 360° application helps meet a common need among users in the Public Safety industry to improve accountability around issuing equipment and inventory out to people, locations and departments.

### Key Benefits:

- Easily create transactions to issue assets and consumable inventory
- Automatically assign assets to a person and department / location
- Automatically adjust inventory quantities on hand
- Manage pharmaceutical expirations and dates
- Build kits to assign multiple inventory items at one time
- Increase accountability with barcode scanning and electronic signature
- Print receipts for proof of acceptance or delivery
- Easily receive and restock returned inventory
- Facilitate efficient chain-of-command processes for inventory assignment
- Historical reporting by agency, department, employee and date range

QuarterMASTER Transaction/Core Application

QuarterMASTER Web Portal

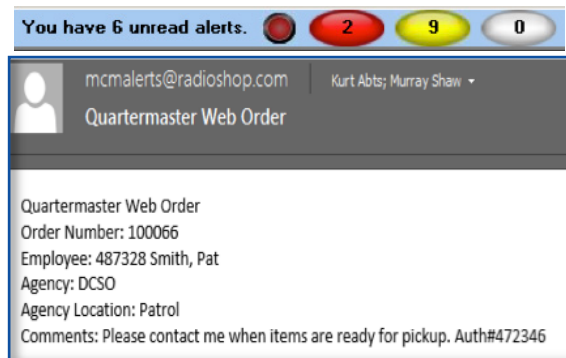

## MCM's QuarterMASTER integrates with:

- Agency Management
- Asset Management
- Inventory Management
- Purchase Orders
- Reporting
- Workflow Alerts\*
- QuarterMASTER Web Portal\*
- Signature Capture\*

*\*enhancement options*

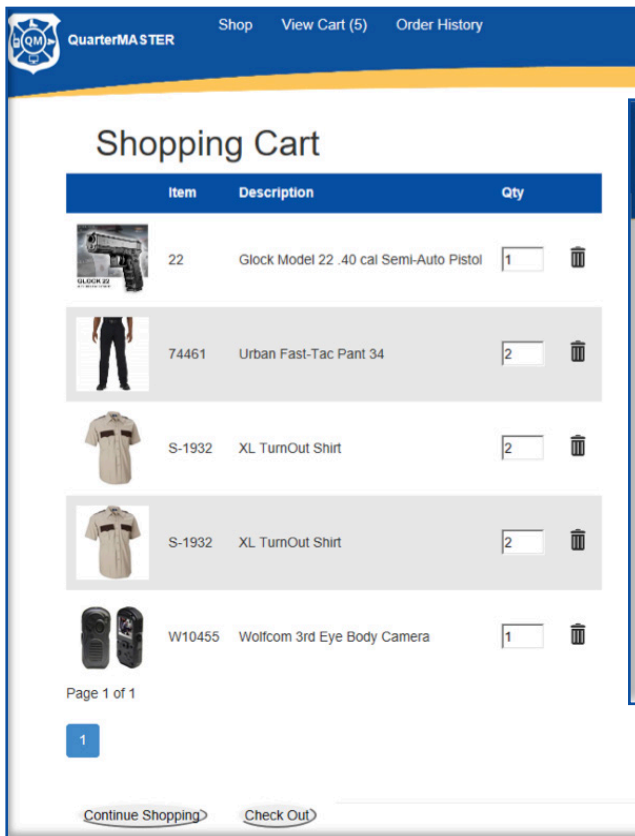

## Seamless integration into MCM's full suite of applications

- QuarterMASTER utilized MCM's Agency, Asset and Parts Inventory modules to create and process transactions

- QuarterMASTER leverages MCM's Alerts application to send email notifications when items are requested, ordered, ready for pick up, delivered, or processed

- The QuarterMASTER Web Portal allows end users to shop and request items online by searching assets and inventory using pictures and descriptions
- New QuarterMASTER Web requests automatically create a new transaction; Alerts can be sent to the person(s) responsible to fulfill the order
