

Quartermaster

- ✓ coordinates front-to-end issuance, from request through distribution, of both serialized assets + consumable inventories in the same transaction
- ✓ creates transactional history of all items + equipment issued to a department, division, location + person
- ✓ allows users to make requests via a user-friendly shopping cart + check status of request + receive notice when items are ready
- ✓ notifies you when orders are placed + approved + when inventory is low

replace emails + calls with automated processes + alerts

capture distribution details quickly + easily on one screen

understand how equipment + supplies are allocated

issue, track + manage
equipment + inventory with
one easy-to-use software
